

Home Escape Planning

Learn to stay safe from fire at home

In this lesson, you'll learn:

- What to do in a fire.
- To make a home escape plan.
- To check the smoke alarms in your home.
- To have a home fire drill.
- What to do if your home fills with smoke.

Let's start with a story.

Listen to State Fire Marshal Peter Ostroskey
read a story about home fire safety.

[Click here for the story.](#)

[Click here to follow along.](#)

What do you know about fire?

Is fire hot?

Yes! Fire is very, very hot.

Can you see during a fire?

No!

Fire makes thick, black smoke you can't see through.

Does fire move slowly?

No!

Fire moves very, very fast.

Now you know:

Fire is hot.

Fire is fast.

Fire is dark.

You must act fast in a fire.
You have only 1 – 3 minutes to escape.

Name something in your house that tells you if there is a fire.

Did you say. . .

SMOKE ALARMS ?

Correct!

Smoke alarms warn you about danger.

Ask an adult in your house to check the smoke alarms.

- ✓ Smoke alarms must be less than 10 years old.
- ✓ Most smoke alarms need new batteries twice a year.
- ✓ Test your alarms. Press the button.
Hear the loud alarm.

Remember, fire is hot, fast and dark.

Make sure your smoke alarms are working
so you can act fast if a fire starts.

What else can keep you safe from fire?

A Home Escape Plan!

Making a home escape plan,
and practicing it, helps everyone in your
family to escape when a smoke alarm sounds.

Make Your Home Escape Plan

Step 1

Together with your family,
look at each room in your house.

Find at least 2 ways out of every room.

The best way out is . . .

Doors

Other ways out:

Doors

Windows

Other ways out:

Fire Escapes

Other ways out:

Ladder to put over
a window sill

There are many ways
to get out!

Why do you need
2 ways out
of every room?

Because fire or smoke
can block one of
the exits!

Make Your Home Escape Plan

Step 2

1. Get your family
2. Get a large piece of paper and pens or markers.
3. Ready?

Draw a floor plan of your home, like this:

Label the rooms.

Include all doors and windows.

Draw the smoke alarms.

Draw arrows showing two ways out of each room.

Does everyone in your family know
2 ways out of each room in your home?

Practice until everyone knows!

Add a safe, outdoor meeting place for the family.

It should be: Away from the home.

Where firefighters
can see you.

Meeting Place

Where will your meeting place be?

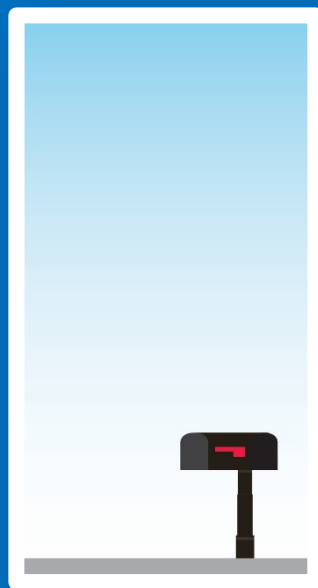

A tree ?

A rock ?

A mailbox?

A lamppost ?

A neighbor's house?

Make Your Home Escape Plan

Step 3

Practice your plan.
Have a fire drill
for the whole family.

Safety Challenge #1

If there is a fire,
you have 1 to 3 minutes to escape.

Challenge everyone to get out
of the house in 2 minutes or less.

Practice with a timer until everyone can get out fast.

Safety Challenge #2

Practice escaping at night, when it's dark.

Everyone has to get out
in 2 minutes or less.

Practice with a timer until everyone can get out fast.

Safety Challenge #3

Take a picture of your family
at your meeting place.

Send the picture to the
fire department.

They can post it
on social media.

Use the hashtag: #practicetheplan

In a fire, remember . . .

If it's smoky, get low and go.

Good air is near the ground.

Close doors on the way
out of each room.

Don't go back inside
for anything!

Not even pets.
Firefighters will
do that.

Call 911 . . .

From your
meeting place.

If both your exits are blocked in a fire . . .

Stuff clothes or blankets
under the door to keep
the smoke out.

And . . .

If you are trapped in a room in a fire:

- Open the window.
- Hang a blanket or sheet out the window.
- Call out your location.
- Shine a flashlight out to show where you are.

Great Work !

You made a home escape plan.

Together with your family, you:

- ✓ Checked your smoke alarms.
- ✓ Learned 2 ways out of every room in your house.
- ✓ Practiced your home escape plan.

Congratulations !!!

You know how to escape a fire.
